

Shirin Shujaa

AI Research Engineer | NLP & Responsible AI

Summary

Second-year Master of AI student at RMIT University, Bachelor of Software Engineering (Honours) and a Minor in AI & ML. Specializing in NLP and Responsible AI, with active research experience in AI alignment, LLM evaluation, and generative AI for low-resource languages. Proficient across the AI/ML stack and experienced in full-stack development using Python. Passionate about AI ethics, fairness, alignment and human-AI interaction, with a focus on developing human-centered and socially responsible AI technologies.

Personal Information

Address Ho Chi Minh City, Vietnam.
Email | LinkedIn shirinshujaa2468@gmail.com | linkedin.com/in/shirin-shujaa.
GitHub|Portfolio github.com/shirin44 | shirin44.github.io/shirin-portfolio.
ORCID 0009-0007-7408-3848.

Education

Expected: Dec. 2026 **Master of AI (2nd Year)** *RMIT University* Ho Chi Minh City, Vietnam.
Nov. 2022 – Feb. 2026 **Bachelor of Software Engineering (Honours), Minor in Artificial Intelligence & Machine Learning** *Royal Melbourne Institute of Technology (RMIT University)* Ho Chi Minh City, Vietnam.
- Academic Excellence Scholarship Recipient (2022–2026).
- Relevant coursework: Data Structures & Algorithms, Computing Theory, Machine Learning, Artificial Intelligence, Software Architecture & Design, Programming Autonomous Robots, Programming IOT

Professional & Research Experience

Jul 2026 – Present **Zeb11 – AI Research Engineer.**
Conducting research on LLMs, AI safety, AI alignment, and generative AI. Designing experiments and evaluation protocols to assess model behavior, robustness, fairness, and reliability. Developing AI prototypes and proof-of-concept applications for enterprise and public-sector use cases. Building end-to-end AI systems using Python and modern ML frameworks while collaborating across research and engineering to translate novel ideas into deployable solutions.

Jul 2026 – Present **L3i - University of La Rochelle – NLP Research Intern.**
Investigated the robustness of LLMs for causal narrative detection in OCR-degraded historical documents. Designed experiments, established performance baselines, and conducted error analyses to identify the effects of different OCR error types. Contributed to the ANR MILL-EHNAS project by advancing methods for large-scale historical text analysis without manual OCR correction.

June 2025 – June 2026 **RMIT University Vietnam – Research Assistant, AI & Health Informatics Research Cluster.**
Conducting NLP research on cultural and linguistic bias in AI-generated text. Designing data pipelines for prompt engineering, model sampling, and dataset documentation. Co-developing bias-aware fine-tuning experiments integrating NLP and sociolinguistic methods. Supporting annotation workflows, literature reviews, and paper writing. Collaborating with VLSP partners on open-source datasets and publications.

Sep. 2025 – Jan. 2026 **DIGI-TEXX, Ho Chi Minh City, Vietnam – AI & NLP Intern.**
Developing NLP and document-understanding systems for enterprise automation. Training Named Entity Recognition (NER) and text classification models for Vietnamese medical data. Building OCR-based data extraction pipelines and integrating NLP models into internal workflow automation tools.

Mar. 2025 – Sep. 2025 **Intel Vietnam – Automation Engineer Intern.**
Led end-to-end automation architecture and VBA integration for custom reporting. Implemented pipelines for file ingestion, email scheduling, and SharePoint archiving, reducing processing time from 4 hours to under 15 minutes while maintaining 100% accuracy.

Jan. 2024 – May 2024 **Wareflex, Ho Chi Minh City, Vietnam Front-End Developer Intern.**
Developed a responsive landing page using React.js & Tailwind CSS for a logistics platform. Reviewed and optimized 100+ pull requests aligned with headless architecture and integrated backend APIs for real-time data.

Selected Publications

- 1 ABSP: Attention-Based Semantic Preservation for Faithful Context Compression. **Shirin Shujaa**, Ginel Dorleon, and Tran Tri Dang. Accepted for *The 2026 ACM/IEEE Joint Conference on Digital Libraries (JCDL)*, forthcoming. doi:10.1145/3805696.3846019
- 2 Hierarchical Fairness-Aware Re-ranking for Recommender Systems. Ginel Dorleon and **Shirin Shujaa**. *Expert Systems with Applications*, forthcoming 2027. doi:10.1016/j.eswa.2026.133772
- 3 BALM: Bias-Aware Generation for Large Language Models. Ginel Dorleon and **Shirin Shujaa**. Book chapter, forthcoming 2027. doi:10.1007/978-3-032-34896-8_2
- 4 How LLMs Handle Cultural Bias: Reactions to Asian Minority Historical Narratives. **Shirin Shujaa**, Ginel Dorleon, and Arthur Tang. Book chapter, 2026. doi:10.1007/978-981-95-4861-3_3
- 5 Uncovering Cultural Biases and Stereotypes in Large Language Models. Ginel Dorleon and **Shirin Shujaa**. Book chapter, 2026. doi:10.1007/978-981-95-4861-3_5
- 6 Detecting Framing Bias in News via Probabilistic Graphical Modeling. **Shirin Shujaa** and Ginel Dorleon. In *2025 ACM/IEEE Joint Conference on Digital Libraries (JCDL)*, 2025. doi:10.1109/JCDL67857.2025.00037
- 7 PrefixGuard: Lightweight LLMs for Hate Speech and Sexism Detection. **Shirin Shujaa** and Ginel Dorleon. Accepted for *IEEE WCCI 2026*, forthcoming.

Skills

Programming Python, C/C++, JavaScript

AI & ML NLP & vision model training, fine-tuning, and evaluation (PyTorch, TensorFlow, Scikit-learn, Hugging Face)

Data Preprocessing, analysis, visualisation, and experiment tracking with pandas, NumPy, Matplotlib

Design Interface design, data visualisation, and rapid prototyping with Figma, Tailwind CSS, Adobe Illustrator

Tools Git, Docker, Linux, Jupyter, VS Code

Awards & Scholarships

- Academic Excellence Scholarship – RMIT University (2022–2026)
- SIGIR Student Travel Grant, ACM/IEEE JCDL 2025
- Selected for SPARK Hub Incubation Program, RMIT University (2025)
- 1st Place – CoverGo AI Hackathon (2025)
- 2nd Place – RMIT × Katalon Testathon (2025)
- 2nd Place – ADC Competition (2025)

Certifications

- ISTQB Certified Tester (Nov 2025)
- Stanford University (Coursera) – Supervised Machine Learning; Generative AI for Everyone
- Microsoft (Coursera) – Fundamentals of UI/UX Design
- UC Irvine (Coursera) – Introduction to IoT & Embedded Systems

Languages

English Fluent (IELTS 8.0/9.0), TESOL Certified

Arabic Native

French Intermediate (B1)

Others

-  IEEE CIS Member (2026)
-  IEEE Young Professionals (2026)
-  ACM SIGIR Member (2025)
-  ICADL 2025 Session Chair
